

Eslam Mohamed Salah

Full Stack .NET Developer

Location: Maadi, Cairo, Egypt Email: eslamsalah5346@gmail.com Phone: +201013114472

GitHub: github.com/eslamsalah5 LinkedIn: linkedin.com/in/eslamsalah55 Portfolio: eslamsalah5.github.io/portfolio

Summary

Full Stack .NET Developer with a strong backend focus, specializing in ASP.NET Core and Angular. Architected a production-ready B2B pharmaceutical distribution platform featuring 388+ REST APIs, AI-powered product mapping, Redis caching, Hangfire, and Azure deployment. Proven expertise in Clean Architecture and EF Core optimization, achieving 60–70% faster API response times and an 89% reduction in N+1 queries.

Skills

Programming Languages: C#, TypeScript, JavaScript (ES6+), Dart, Java, C++

Back-End: ASP.NET Core (Web API & MVC), Entity Framework Core, LINQ, SQL Server, REST API Design, API Versioning, Authentication & Authorization (JWT, API Keys, RBAC), Rate Limiting, Hangfire, Redis, Serilog, Fluent-Validation, AutoMapper, Swagger/OpenAPI

Front-End: Angular, TypeScript, RxJS, HTML5, CSS3, Bootstrap 5, Responsive Design

Architecture & Design: Clean Architecture, Onion Architecture, SOLID Principles, Repository Pattern, Unit of Work, Result Pattern, OOP, Design Patterns

Cloud & DevOps: Microsoft Azure (App Service, Azure SQL Database, Azure Redis), Docker, CI/CD, Git, GitHub

Tools & Libraries: Visual Studio, VS Code, Postman, Swagger UI, Firebase

AI & Productivity: GitHub Copilot, Google Gemini API, OpenAI API, RAG Architecture, Prompt Engineering

Concepts: Data Structures & Algorithms, Database Design, Caching Strategies, Agile (Scrum)

Experience

Specialized Pharmaceutical Distribution Company, Maadi, Cairo

Nov 2025 – Mar 2026

Full Stack .NET Developer

- Built a B2B platform from scratch using Clean Architecture connecting pharmacies with warehouses, achieving a **70% reduction in API response times** and eliminating 89% of N+1 query issues.
- Developed the backend with **388+ REST APIs** using .NET 9 and EF Core 9, including an AI-powered product mapping engine and background processing via Hangfire.
- Built an Angular 21 admin dashboard with Signal-based state management and a **RBAC system** featuring 66+ distinct permissions across 7 roles.
- Implemented optimistic locking (RowVersion) and Redis caching for high-concurrency order management.

Projects

GoDawa – Pharmaceutical Distribution Ecosystem

Nov 2025 – Apr 2026

(Commercial/Showcase) | [GitHub](#)

- Built a pharmaceutical supply chain hub connecting pharmacies with warehouses across Egypt, including API infrastructure serving a Flutter mobile app (cross-team collaboration).
- Built a secure **Stock Sync API** with custom API Key authentication for external ERP systems, enabling real-time inventory updates (Full/Delta sync) and automated order polling.

- Designed API contracts supporting AI voice ordering, push notifications via Firebase FCM, and invoice export in PDF, Excel, and CSV.
- **Technologies:** .NET 9, Angular 21, SQL Server, Redis, Hangfire, Azure, Serilog, Swagger/OpenAPI.

Money Flow – Expense & Wallet Management API

Jul 2025 – Sep 2025

Live Demo: [Google Play](#)

- Built a REST API for expense and wallet management with JWT authentication, OTP email verification, and Google/Facebook OAuth social login.
- Wallet deposit/withdraw with optimistic concurrency (RowVersion) and ACID transactions; expense CRUD with auto balance adjustments and 11 built-in report periods.
- Covered core business logic with **51+ unit tests** (xUnit + Moq) at 100% pass rate.
- **Technologies:** ASP.NET Core 9, EF Core, SQL Server, Identity, JWT, Serilog, FluentValidation, Swagger

FashionHub – Full-Stack E-Commerce Platform

May 2025 – Jun 2025

GitHub (API): [GitHub](#) GitHub (Angular): [GitHub](#) Live Demo: [fashionhub.runasp.net](#)

- Built a complete e-commerce platform (ASP.NET Core + Angular 21 with SSR and Signals-based state) — product browsing, cart, order tracking, and admin dashboard. Live and deployed.
- Integrated Stripe and Paymob via a unified IPaymentGateway (Strategy Pattern) with webhook verification, server-side amount enforcement, and cart snapshot to prevent overselling.
- **Technologies:** ASP.NET Core Web API, Angular 21, EF Core, SQL Server, Stripe, Paymob, JWT, Identity, Onion Architecture, SSR, Serilog, Swagger

Ra7ala – Bus Booking Platform (ITI Graduation Project)

Apr 2025 – May 2025

GitHub: [GitHub](#) Live Demo: [Live Demo](#)

- Built a full-stack bus booking platform (ASP.NET Core 9 + Angular 19) with trip management, seat booking, and role-based dashboards for 5 user roles.
- Integrated Stripe with webhooks for automated payment state sync and server-side amount enforcement.
- Built a Google Gemini AI chatbot with live trip context, auto-detecting user language (Arabic/English).
- **Technologies:** ASP.NET Core 9, Angular 19, EF Core, SQL Server, Stripe, Gemini AI, JWT, Clean Architecture

Education

Zagazig University

Oct 2020 – Jul 2024

B.Sc. in Information Technology (GPA: 3.63/4.0 – Excellent with Honors, Distinction)

Internships

Information Technology Institute (ITI), Zagazig Branch

Nov 2024 – Apr 2025

.NET Full Stack Web Development Intensive Training Program

Additional Information

Languages: Arabic (Native), English (Intermediate - B2) **Nationality:** Egyptian **Military Status:** Exempted
