Summary

.NET Full-Stack Developer with hands-on experience building RESTful APIs and single-page applications using C#, ASP.NET Core, EF Core, SQL Server, and Angular. Implemented authentication with ASP.NET Identity and JWT, integrated payments (Stripe/PayPal), and applied Clean/Onion architecture and repository patterns. Seeking a junior .NET developer role to contribute backend and frontend skills to production systems.

Skills

Programming Languages: C#, Dart, TypeScript, JavaScript (ES6+), Java, C++

Back-End Technologies: ASP.NET Core (MVC & Web API), Entity Framework Core (EF Core), SQL Server, RESTful APIs, JWT, ASP.NET Identity, ADO.NET, LINQ, Serilog, FluentValidation, CQRS

Front-End Technologies: HTML5, CSS3, Angular, Bootstrap, jQuery, Responsive Design

Concepts: OOP, SOLID principles, Design principles, Design patterns, Data Structures & Algorithms, Agile (Scrum)

Design & Architecture: Clean Architecture, Onion Architecture, MVC, MVVM, Repository Pattern, Unit of Work

Tools: Visual Studio, VS Code, Android Studio, Postman, GitHub, Trello, Jira, Notion

Soft Skills: Attention to detail, Communication, Collaboration, Works under pressure, Presentation, Teamwork

Internships

Information Technology Institute (ITI), Zagazig Branch

Nov. 2024 – Apr. 2025

Intensive Training Program – .NET Full Stack Web Development track

- Participated in an intensive training program focused on .NET full stack web development, covering advanced topics in ASP.NET Core, Angular, and SQL Server.

Education

Zagazig University

2020 – 2024

B.Sc. in Information Technology (GPA: 3.63 - Excellent with Honors, Distinction)

Experience and Projects

PayMind — Full-stack Expense & Wallet Management

Jul. 2025 – Aug. 2025

- Developed a compact system for tracking personal expenses and wallet balance, enabling users to record spending, set future payment reminders, and view spending reports.
- Implemented secure user accounts and profile management with sign-up, login, and social login functionalities.
- Built per-user wallet with deposit/withdraw flows and immediate balance updates, supporting negative balances.
- Enabled full CRUD operations for expenses, with future date scheduling for payment reminder alerts.
- Provided reports with daily, monthly, yearly, and custom insights, including category breakdowns and averages.
- Ensured reliable balance updates with transactions, validation, logging, and clear API docs.

- **Technologies Used:** .NET 9, ASP.NET Core Web API, EF Core, SQL Server, ASP.NET Identity, JWT, Serilog, FluentValidation, Swagger/OpenAPI

FashionHub (Web API) [↗](#)

May 2025 – Jun. 2025

- Developed a RESTful e-commerce API for clothing with cart, orders, and Stripe payment integration.
- Applied Repository Pattern and Unit of Work for clean and maintainable architecture using Onion structure.
- Implemented role-based access and JWT authentication with ASP.NET Identity.
- **Technologies Used:** ASP.NET Core Web API, EF Core, SQL Server, Stripe, JWT, Identity, Onion Architecture

Ra7ala - Bus Management System [↗](#)

Apr. 2025 – May 2025

ITI Graduation Project

- Developed a full-stack multi-role bus booking platform with secure authentication, admin onboarding, route and station planning, and dynamic trip management.
- Integrated AI chatbot using RAG system for real-time user assistance, and live trip/station mapping using coordinates.
- Implemented system approval workflow, feedback and rating system, and role-based access for owners, super admins, admins, drivers, and passengers.
- **Technologies Used:** Angular 19, ASP.NET Core 9, SQL Server, Entity Framework Core, Identity, JWT, Onion Architecture, Email Service

Kito (Flutter Application) [↗](#)

Jul. 2024 – Aug. 2024

- Developed a responsive mobile app for a French keto diet restaurant featuring nutritional tracking, online ordering, and secure payments with Firebase Auth and PayPal/Stripe using Clean Architecture and Bloc.
- **Technologies Used:** Flutter, Firebase, Hive, REST API, Dio, Clean Architecture, Bloc, PayPal, Stripe

Epilepsy – Seizure Management Assistant

Oct. 2023 – Jun. 2024

University Graduation Project

- Developed a mobile app to support epilepsy patients with real-time seizure alerts, smart medication reminders, and doctor communication.
- Implemented ML model to detect current seizure status based on user data.
- Used Firebase for real-time services and secure multi-provider authentication.
- Applied Clean Architecture with MVVM and Cubit for scalable state management.
- **Tech Stack:** Flutter, Firebase, Local DB, ML Model, MVVM
- **Grade:** High Distinction

Certifications

- Certificates available on Google Drive [↗](#)
