Summary

Full Stack .NET Developer with a strong backend focus, specializing in building scalable enterprise systems using ASP.NET Core and Angular. Proven ability to independently architect and deliver production-grade platforms with 400+ API endpoints, AI-powered features, and Clean Architecture principles. Experienced in secure authentication and authorization, performance optimization, background job processing, and cloud deployment on Microsoft Azure.

Skills

Programming Languages: C#, TypeScript, JavaScript (ES6+), Dart, Java, C++

Back-End: ASP.NET Core (Web API & MVC), Entity Framework Core, LINQ, SQL Server, REST API Design, API Versioning, Authentication & Authorization (JWT, API Keys, RBAC), Rate Limiting, Background Job Processing (Hangfire), Redis (Distributed Caching), Logging (Serilog), Validation & Mapping (FluentValidation, AutoMapper), Swagger/OpenAPI

Front-End: Angular 21, TypeScript, RxJS, HTML5, CSS3, Bootstrap 5, Responsive Design

Architecture & Design: Clean Architecture, SOLID Principles, Repository Pattern, Unit of Work, Result Pattern, OOP, Design Patterns

Cloud & DevOps: Microsoft Azure (App Service, Azure SQL Database, Azure Redis Cache), Health Checks, CI/CD, Git, GitHub

Tools & Libraries: Visual Studio, VS Code, Postman, Swagger UI, Firebase

Concepts: Data Structures & Algorithms, Database Design, Caching Strategies, Agile (Scrum)

Soft Skills: Problem-Solving, Communication, Teamwork, Continuous Learning, Attention to Detail

Experience

Dawaa Al-Nile, Maadi, Cairo

Nov 2025 – Present

InstaDawa – Enterprise Pharmaceutical Distribution Platform

- Architected and developed a production-grade full-stack B2B pharmaceutical distribution platform using ASP.NET Core 9 and Angular 21, following Clean Architecture and SOLID principles.
- Designed and implemented **400+ RESTful APIs** covering authentication, products, orders, inventory, returns, analytics, and AI-powered product mapping.
- Built an AI-based product matching system achieving **95%+ automatic accuracy** using barcode lookup, fuzzy search, and manufacturer/category intelligence.
- Implemented secure **JWT + API Key authentication** with RBAC supporting **6 roles and 40+ granular permissions**, including OTP email verification, session control, and rate limiting.
- Built backend APIs for Flutter mobile app with Firebase notifications, file-based ordering, and 25+ mobile features.
- Improved system performance by **70% faster response times** and reduced critical database queries by **89%** through Redis distributed caching, indexing strategies, and elimination of N+1 queries.
- Developed background job processing with Hangfire, integrated Firebase push notifications for mobile apps, and deployed the system on Microsoft Azure with monitoring, logging (Serilog), and CI/CD pipelines.
- **Technologies:** ASP.NET Core 9, C#, EF Core, SQL Server, Redis, Angular 21, TypeScript, Hangfire, Azure, JWT, FluentValidation, AutoMapper, Serilog, Swagger/OpenAPI, Firebase, Git

Internships

Information Technology Institute (ITI), Zagazig Branch

Nov 2024 – Apr 2025

.NET Full Stack Web Development Intensive Training Program

Education

Zagazig UniversityOct 2020 – Jul 2024

B.Sc. in Information Technology (GPA: 3.63/4.0 – Excellent with Honors, Distinction)

Projects

- Money Flow – Expense & Wallet Management Jul 2025 – Sep 2025
- Built comprehensive expense tracking and wallet management system with secure authentication (JWT, Identity, social login).
 - Implemented wallet operations (deposit/withdraw) with real-time balance tracking, validation, and ACID transaction support.
 - Added expense CRUD with scheduling capabilities and reporting features (daily, monthly, yearly) with Swagger API documentation.
 - Technologies:** ASP.NET Core Web API, EF Core, SQL Server, Identity, JWT, Serilog, FluentValidation, Swagger
- FashionHub – E-commerce Web API May 2025 – Jun 2025
- Built RESTful API for online clothing store with shopping cart, order management, Stripe payment integration, and role-based authentication.
 - Technologies:** ASP.NET Core Web API, EF Core, SQL Server, Stripe, JWT, Identity, Onion Architecture
- Ra7ala – Bus Management System (ITI Graduation Project) Apr 2025 – May 2025
- Developed comprehensive bus booking platform with authentication, trip management, booking workflows, and role-based dashboards.
 - Integrated AI chatbot using RAG (Retrieval-Augmented Generation) to answer route queries, guide passengers, and enhance trip planning with interactive mapping.
 - Technologies:** Angular 19, ASP.NET Core 9, EF Core, SQL Server, Identity, JWT, Onion Architecture
- Epilepsy – Seizure Management Assistant (University Graduation Project) Oct 2023 – Jun 2024
- Built mobile application for epilepsy patients featuring emergency alerts, medication reminders, ML-based seizure detection, and doctor communication.
 - Technologies:** Flutter, Firebase, ML Model, MVVM, Cubit
- Grade: High Distinction

Additional Information

Languages: Arabic (Native), English (Intermediate - B1)

Nationality: Egyptian

Military Status: Exempted
